OVERVIEW

You can configure a setting to authenticate users when logging on to the Medvantage software. The authentication can be configured based on various Multifactor Authentication (MFA) Methods such as Email, SMS. The OTP (One-Time Password) can be sent to one or all these methods.

EMAIL AND SMS AUTHENTICATION-

Based on your selected option (Email or SMS), OTP will be sent to your email address / mobile. When you log on to the Medvantage software, the below screen will appear and click on Registration tab where you will have to enter 10-digit mobile number/ email address OTP received in your email / SMS.

The OTP will expire after 5 minutes.
